Contents of Volume 4

NUMBER 1, JANUARY 1977

A. KERTESZ AND J. B. PHIPPS. Numerical Taxonomy of Aphasia ..	1
EGON WEIGL AND ALEXANDRU FRADIS. The Transcoding Processes in Patients with Agraphia to Dictation	11
ALAN E. DAVIS AND JUHN A. WADA. Hemispheric Asymmetries in Human Infants: Spectral Analysis of Flash and Click Evoked Potentials	23
MICHAEL NATALE. Perception of Nonlinguistic Auditory Rhythms by the Speech Hemisphere	32
ARTHUR L. BENTON. Reflections on the Gerstmann Syndrome ..	45
EILEEN B. FENNELL, DAWN BOWERS, AND PAUL SATZ. Within- Modal and Cross-Modal Reliabilities of Two Laterality Tests ..	63
CATHERINE G. WOLF. The Processing of Fundamental Frequency in a Dichotic Matching Task	70
J. MALY, M. TURNHEIM, W.-D. HEISS, AND K. GLONING. Brain Perfusion and Neuropsychological Test Scores: A Correlation Study in Aphasics	78
S. R. ROCHESTER, J. R. MARTIN, AND S. THURSON. Thought- Process Disorder in Schizophrenia: The Listener's Task	95
DANIEL B. HIER AND J. P. MOHR. Incongruous Oral and Written Naming. Evidence for a Subdivision of the Syndrome of Wernicke's Aphasia	115
PAPERS TO APPEAR IN FORTHCOMING ISSUES	127

NUMBER 2, APRIL 1977

A. R. LURIA AND J. THOMAS HUTTON. A Modern Assessment of the Basic Forms of Aphasia	129
JEFF MINCKLER, MARY JAEGER, JOHN FERRARO, MAX POWERS, ROBERT CRACE, ROBERT CAMPAIN, MICHAEL METZ, AND SHIRLEY MARTIN. The Human Auditory Pathways. A Quantita- tive Study	152
JOHN A. FERRARO AND JEFF MINCKLER. The Brachium of the Inferior Colliculus. The Human Auditory Pathways: A Quantita- tive Study	156
I. VOINESCU, EVY VISH, SVETLANA SIRIAN, AND M. MARETSIS. Aphasia in a Polyglot	165
F.-J. STACHOWIAK, W. HUBER, K. POECK, AND M. KERSCHEN- STEINER. Text Comprehension in Aphasia	177
GÜNTER PEUSER AND MAREN FITTSCHEN. On the Universality of Language Dissolution: The Case of a Turkish Aphasic	196

MARSHALL DURBIN AND RONALD L. MARTIN. Speech in Mania: Syntactic Aspects	208
ARTHUR WINGFIELD. The Perception of Alternated Speech	219
COLIN MARTINDALE. Syntactic and Semantic Correlates of Verbal Tics in Gilles de la Tourette's Syndrome: A Quantitative Case Study	231
FRANCIS J. PIROZZOLO AND KEITH RAYNER. Hemispheric Specialization in Reading and Word Recognition	248
CATHERINE MATEER AND DOREEN KIMURA. Impairment of Non-verbal Oral Movements in Aphasia	262
JOHN A. FERRARO AND JEFF MINCKLER. The Human Lateral Lemniscus and Its Nuclei. The Human Auditory Pathways: A Quantitative Study	277
JOSÉ MORAIS AND MICHELE LANDERCY. Listening to Speech While Retaining Music: What Happens to the Right-Ear Advantage?	295
ALEXANDER A. MANNING, WILLIAM GOBLE, ROBERT MARKMAN, AND THOMAS LABRECHE. Lateral Cerebral Differences in the Deaf in Response to Linguistic and Nonlinguistic Stimuli	309
H. JOHN VAN DUYNE, DIRK BAKKER, AND WILL DE JONG. Development of Ear-Asymmetry Related to Coding Processes in Memory in Children	322
BOOK REVIEWS	335
PAPERS TO APPEAR IN FORTHCOMING ISSUES	354

NUMBER 3, JULY 1977

DOROTHY TILLMAN AND LOUIS J. GERSTMAN. Clustering by Aphasics in Free Recall	355
E. LLOYD DU BRUL. Origin of the Speech Apparatus and Its Reconstruction in Fossils	365
JOHN H. FERGUSON AND FRANÇOIS BOLLER. A Different Form of Agraphia: Syntactic Writing Errors in Patients with Motor Speech and Movement Disorders	382
KENNETH M. HEILMAN, DAWN BOWERS, WILEY C. RASBURY, AND ROSE M. RAY. Ear Asymmetries on a Selective Attention Task	390
WARREN H. FAY AND RALPH O. COLEMAN. A Human Sound Transducer/Reproducer: Temporal Capabilities of a Profoundly Echolalic Child	396
ANNE GATES AND JOHN L. BRADSHAW. The Role of the Cerebral Hemispheres in Music	403
A. R. LURIA. On Quasi-Aphasic Speech Disturbances in Lesions of the Deep Structures of the Brain	432

NOTES AND DISCUSSION

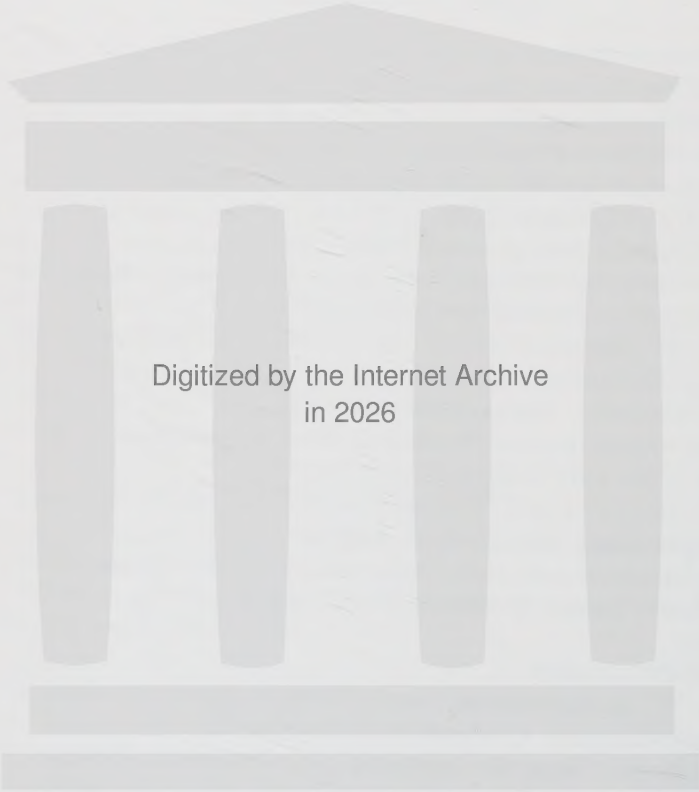

LORAIN K. OBLER AND MARTIN L. ALBERT. Influence of Aging on Recovery from Aphasia in Polyglots	460
ELAINE O. CHAIKA. Schizophrenic Speech, Slips of the Tongue, and Jargonaphasia: A Reply to Fromkin and to Lecours and Vanier-Clément	464
PAPERS TO APPEAR IN FORTHCOMING ISSUES	476

NUMBER 4, OCTOBER 1977

TIM SHALLICE AND ELIZABETH K. WARRINGTON. Auditory-Verbal Short-Term Memory Impairment and Conduction Aphasia ...	479
MARTHA S. BURNS AND GERALD J. CANTER. Phonemic Behavior of Aphasic Patients with Posterior Cerebral Lesions	492
SHEILA E. BLUMSTEIN, VIVIEN C. TARTTER, DEE MICHEL, BARBARA HIRSCH, AND EVERETT LEITER. The Role of Distinctive Features in the Dichotic Perception of Vowels	508
RICKYE S. HEFFNER. Developmental Auditory Agnosia in Retarded Adolescents: A Preliminary Investigation	521
R. EFRON, M. DENNIS, AND E. W. YUND. The Perception of Dichotic Chords by Hemispherectomized Subjects	537
SEYMOUR AXELROD, TIRTADHARYANA HARYADI, AND LILLIAN LEIBER. Oral Report of Words and Word Approximations Presented to the Left or Right Visual Field	550
JOHN H. V. GILBERT AND L. RACHEL PRATT. Cross-Modal Matching and Association under Sodium Amytal	558
TAPANI JAUHIAINEN AND ARTO NUUTILA. Auditory Perception of Speech and Speech Sounds in Recent and Recovered Cases of Aphasia	572

NOTES AND DISCUSSION

HUGH W. BUCKINGHAM, JR. A Critique of A. R. Luria's Neurodynamic Explanation of Paraphasia	580
DAVID GALIN, ROBERT DIAMOND, AND JEANNINE HERRON. Development of Crossed and Uncrossed Tactile Localization on the Fingers	588
BOOK REVIEW	591
PAPERS TO APPEAR IN FORTHCOMING ISSUES	597
AUTHOR INDEX FOR VOLUME 4	599

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery and speech pathology. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Manuscripts should be submitted to either:

Editor: Harry A. Whitaker, Ph.D.
Department of Psychology
University of Rochester
Rochester, New York 14627

Associate Editor: Alan B. Rubens, M.D.
Chief, Aphasia Center,
Hennepin County Medical Center
701 Park Avenue South
Minneapolis, Minnesota 55415

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Brain and Language* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Form of Manuscript. Authors should submit manuscripts in *triplicate* (one original and two copies), typewritten, double-spaced on one side of 8.5 × 11 in. white paper. The original and two copies of all artwork, tabular material, photographs, etc. must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces) and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing.

Tables should be numbered in order of appearance (with Arabic numerals): they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lower case letters, ^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals, ^{1,2}, etc., cited consecutively throughout the article starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date

in parentheses, e.g., Goldstein (1948) or (Russell and Espir, 1961). If more than one paper was published by the same author in a given year, the correct style is Broca (1861a) or (Broca, 1861b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Allison, R. S. 1962. *The senile brain*. London: Edward Arnold.

Koh, S. D., Vernon, M., & Bailey, W. 1971. Free-recall learning of word lists by prelingual deaf subjects. *Journal of Verbal Learning and Verbal Behavior*, **10**, 542-547.

Luria, A. R., & Tsvetkova, L. S. 1970. The mechanism of "dynamic aphasia." In M. Bierwisch & K. E. Heidolph (Eds.) *Progress in linguistics*. The Hague: Mouton. Pp. 187-197.

(Use underlining for journal and book titles only.)

Proofs. Galley proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.
